

Simula's review for Janitor AI

The product team's deck, flows/slides.pdf, draws c01, c05.

2 idea(s) split the reviewers, so they aren't drawn; the Needs your call page at the end lists them.

The explore step finished only part of its work: the core loop completed 6 of 8 passes (last: stopped: out of time).

Notes kept off the deck's slides

- **c05 · 5× context for better memory on your next 5 replies**

Cost check (CONDITIONAL): a view pays for what it costs to serve only where ad prices are high.

Every idea the review scored

Idea	Title	Verdict	Checks	Why
c01	Faster replies for one hour	accepted	12/12	passed every check
c05	5× context for better memory on your next 5 replies	accepted	12/12	cost check: a view pays for what it costs to serve only where ad prices are high
c04	A gold ring around your profile picture for 24 hours	conditional	9/12	didn't pass people already value what it gives, backed by what was seen in the app, fair to paying users
c08	Wear the golden checkmark for 24 hours by backing a creator	conditional	11/12	didn't pass backed by what was seen in the app
c06	Priority routing for faster replies for one hour	rejected	12/12	dropped by code: duplicate of c01: same benefit (faster replies)
c07	Faster replies with this smaller creator's character for 24 hours	rejected	11/12	dropped by code: duplicate of c01: same benefit (faster replies); didn't pass backed by what was seen in the app
c03	Double the memory for your next 10 messages	rejected	10/12	didn't pass backed by what was seen in the app, fair to paying users; cost check: a view pays for what it costs to serve only where ad prices are high; it may give away something the app could sell
c09	Faster replies for your next 20 replies today	rejected	11/12	dropped by code: duplicate of c01: same benefit (faster replies); didn't pass backed by what was seen in the app
c02	Golden checkmark next to your username for 24 hours	rejected	11/12	dropped by code: duplicate of c08: same benefit (golden checkmark); didn't pass backed by what was seen in the app
c10	Golden checkmark next to your username for 24 hours	rejected	11/12	dropped by code: duplicate of c08: same benefit (golden checkmark); didn't pass backed by what was seen in the app

Needs your call

- **c04 · A gold ring around your profile picture for 24 hours**

"people already value what it gives": one reviewer: no (For a product_change, the new resource (the gold ring) must be a slice of something the app charges for or something the player uses in a core flow. The proposal itself says 'piece of a paid benefit: none' and that the ring is 'not sold'. The ring is a cosmetic shown to other users, and no observed core flow (f1-f6) uses it); another: yes (The product change gives the player a ring on their own profile,, which is used in the observed character-creation flow f5. The reward does not go to another user or creator).

"backed by what was seen in the app": one reviewer: no (The rationale claims subscribers otherwise see no ads. The model does not establish that: exp2 observed no ad, but the account's plan was not recorded); another: yes (The golden checkmark claim is supported by and. The profile content and public profile link are supported by, and the ring itself is the proposal's new feature. The claim that subscribers 'otherwise see no ads' is unverified (see other_concern)).

"fair to paying users": one reviewer: no (Paying users see the offer, and the offer copy and what-makes-it-work-here field pitch the ring as an extension of the golden checkmark sold by Plus in. That is more of what their plan sells); another: yes (Subscribers see a ring that the plan does not include, and it sits on the profile screen, which is not a paid area. Nothing in the model shows that Plus removes ads).

To approve: {"id": "c04", "splits": ["c1_revealed_value", "c2_evidence", "c3_spare_payers"]}

- **c08 · Wear the golden checkmark for 24 hours by backing a creator**

"backed by what was seen in the app": one reviewer: no (The rationale claims users cannot get the badge without paying, and the when-the-reward-runs-out field says Plus keeps it next to their name 'for good.' The paywall shows a Plus badge benefit on a cancellable monthly plan—e12), but does not support either absolute claim about the current app); another: yes (The golden checkmark as a Plus benefit is supported by and. The like button, the creator handle, and the Hidden Gems feed that lists Parkour Reborn are observed. The creator-notice, cost, and publishing-impact statements are the proposal's own additions or predictions).

To approve: {"id": "c08", "splits": ["c2_evidence"]}

The reviewers split on these ideas, so none is drawn. To draw one, add its "To approve" entry to **promote** in **flows/approvals.json** and run flows again.
