

Rewarded-ad ideas for Janitor AI

1. **Existing opportunity** Faster replies for one hour
2. **Existing opportunity** 5× context for better memory on your next 5 replies

Each idea takes two slides: its whole flow, step by step, then why it works.

In every idea the user chooses to play. The reward comes once, only after the play is verified, and closing the game or a failed ad uses nothing up.

Faster replies for one hour

Where the offer appears: A small sheet that slides up over the Janitor Plus paywall right after the user taps Close.

The offer says: “Not ready for Janitor Plus? Play a short game and get faster replies for the next 1 hour. Janitor Plus keeps them on all month.” Saying no changes nothing.

TODAY

A free user reads the Janitor Plus offer and taps Close.

WHEN IT APPEARS

A free user taps Close on the Janitor Plus paywall.

THE OFFER

A sheet offers faster replies for 1 hour for one short game.

THE AD PLAYS

The user plays a short sponsored game and can quit at any time.

WHAT THEY GET

A label appears: “Faster replies are on For the next 60 minutes”.

They get: faster replies, 1 hour · **How often:** 2 per day, resets at midnight local time

Why this works for your app

WHAT THE USER GETS

Faster replies, 1 hour.

WHAT THE APP GETS

Replies in this app are long and take over a minute to finish, so a free user who just said no to \$12.99 still wants them sooner. The reward uses routing the app already gives Plus members and adds no replies, so it costs almost nothing to serve. It turns a closed paywall into ad revenue and lets free users feel one Plus benefit before deciding again.

WHAT IT NEVER COSTS THEM

Nothing free is taken away, and saying no changes nothing. Janitor Plus members already have faster replies and never see this offer.

Reach scenario, not a measurement: the offer sits on a screen a few taps in, and appears only when this happens: A free user taps Close on the Janitor Plus paywall.

When the reward runs out: When the hour ends, a banner says replies are back to normal speed and that Janitor Plus keeps them fast all month for \$12.99.

5× context for better memory on your next 5 replies

Where the offer appears: A sheet that slides up over the Janitor Plus paywall right after the close button is tapped.

The offer says: “Not ready to subscribe? Play a short game and your next 5 replies get 5× context for better memory, until midnight tonight.” Saying no changes nothing.

TODAY

A user back after a week away opens the Janitor Plus paywall and taps close.

WHEN IT APPEARS

A user whose previous visit was 7 or more days ago taps close on the Janitor Plus paywall without subscribing.

THE OFFER

A sheet offers 5 replies with 5× context for one short game, until midnight.

THE AD PLAYS

The user plays a short sponsored game.

WHAT THEY GET

A label appears: “◆ Next 5 replies: 5× context until midnight”.

They get: 5 replies with 5× context, until midnight local time · **How often:** 1 per user per 7 days, offered only on a visit after 7 or more days away; resets 7 days after it was taken.

Why this works for your app

WHAT THE USER GETS

5 replies with 5× context, until midnight local time.

WHAT THE APP GETS

A returning user who just closed the paywall still wants the plan's headline benefit; a few replies with more memory let them pick up a long story without paying today, and gives them a reason to keep chatting this session. It costs fresh model replies, so it pays for itself mainly with a North American audience or cheaper serving; in LATAM it likely does not.

WHAT IT NEVER COSTS THEM

Nothing free is taken away, and saying no changes nothing. Janitor Plus members already have 5× context and never see this offer.

Reach scenario, not a measurement: the offer sits on a screen a few taps in, and appears only when this happens: A user whose previous visit was 7 or more days ago taps close on the Janitor Plus paywall without subscribing.

Review notes: see Simula's review.

When the reward runs out: After the 5th reply a small note says memory is back to normal and that Janitor Plus keeps 5× context on every chat, which shows the returning user exactly what the plan adds to the story they came back for.
